

# Color Position Guide

The following was put together to assist you in placing color position on your publication in the most cost effective manner.

Color position and charges are based on what we call ink fountains. For example, a broadsheet (standard publication), has two pages per ink fountain.

The follow documents (we call them dummies), will tell you what pages paginate together in a given publication.

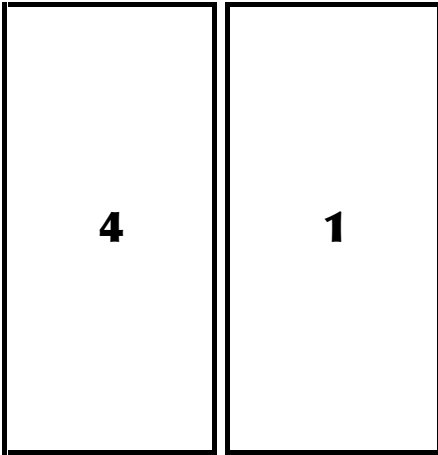

On the dummies the ink fountains read from left to right and are bracketed so you can decide where on your publication you would like to run color.

The dummies range from 4 pages to 24 pages. Please note the dummies represent the standard setup of the press. However, due to the versatility of our press equipment you can request custom color placement by notifying your Sonoma Valley Publishing Customer Service Representative ahead of time.
